CLOUD SERVICES

Cloud computing opens the door to new ways of working, communicating and collaborating. Companies are discovering a vast range of operational, process and fiscal efficiencies, from company-wide email to custom applications and comprehensive networking and security systems by moving to a Cloud-based solution.

Supra ITS operates state of the art data centres that provide a powerful, safe and scalable platform for our customers' private and public Cloud needs. Supported by a certified team of engineers with experience in the major cloud platforms, we are ideally positioned to help customers plan, implement and migrate to a managed cloud environment.

IN FOCUS

Managed Cloud Services give companies access a world of technology on demand, from software and infrastructure to support and staff. Effective Cloud strategies reduce the cost burden of purchase, storage, management and maintenance, while maximizing the capacity and ROI of a company's private, public and hybrid technology environments.

MIGRATE TO IT

WHAT'S THE PROBLEM

Business today operate in hybrid environments, with dedicated hardware and Cloud infrastructure supporting business operations. In-house resources can rarely support such increasingly complex and evolving environments effectively, which is where a Managed Services Provider can help.

A shopping list of big ticket items - from networks, servers and hardware to software and business applications – create a constant drain on budget and resources. When inventory multiplies, so does the cost.

The capacity of these assets is rarely maximised, but the expertise required to install, manage, maintain and upgrade systems is considerable.

Traditional IT environment

- ✓ Complex, expensive infrastructure
- ✓ Configuration & testing time
- ✓ Cost of maintenance, support
- ✓ In-house IT requires storage space
- ✓ Investments become outdated
- ✓ Limited support availability
- ✓ One-off expences damage budget
- ✓ Stuck with obsolete purchases
- ✓ Unscalable, inflexible systems
- ✓ Wasted IT investments

WHAT YOU NEED

The appeal of the Cloud is the opportunity to streamline operations and lower costs associated with infrastructure investments, services and the management needed to deliver comparable performance from internally managed resources.

Sophisticated software and applications, and faster, better networking and hardware are helping businesses improve operations – but these tools and technologies come with capital costs that challenge budgets. The range of Cloud products and services now available help smaller companies to be smarter, lighter and more nimble than ever before.

Business in the Cloud

- ✓ Collaboration
- ✓ CRM
- ✓ Expertise on-demand
- ✓ Flexible storage
- ✓ Improve accessibility
- ✓ Infrastructure-as-a-Service
- ✓ Low-no infrastructure costs
- ✓ Platform-as-a-Service
- ✓ Reduce capital costs
- ✓ Scalable services and billing
- ✓ Secure systems and environment
- ✓ Service reliability
- ✓ Software-as-a-Service
- ✓ Streamline processes
- ✓ Support on-demand
- ✓ Systems and platform integration

WHAT WE DO

As a technology partner with extensive cloud capabilities, we help companies select, move to and manage a best-of-breed, practical cloud computing solution.

Over time, every businesses develops a unique technology environment of desktops, databases, networks and storage. With so much on the line, we understand that a move from older technology investments to the Cloud can be a challenging call.

Sometimes smaller steps make sense, and from single product or service solutions, we can develop an integrated approach and customized solution that reduces IT costs while adding new capabilities, greater performance and new efficiencies to your business.

Supra ITS Cloud Services

- ✓ Automatic software upgrades
- ✓ Certified Cloud engineers
- ✓ Flexible billing
- ✓ Major reduction in IT costs
- ✓ Mobile and desktop device support
- ✓ Remote access from anywhere
- ✓ Simplified, integrated systems management
- ✓ SLAs geared to your business
- ✓ Streamline business processes
- ✓ User configuration
- ✓ Virtual private Cloud
