WHAT'S THE
PROBLEM

As business sectors emerge, evolve and expand, so the regulations increase. For many businesses – SMBs in particular – life gets complicated.

It is every company's responsibility to monitor and maintain awareness of each and every regulatory change, and to adapt their business practices accordingly and in good time.

Maintaining compliance across all areas of business can be an exhausting undertaking, especially in organisations where inter-departmental communication is weak. Complaince processes divert valuable time and resources away from the core business activities that move a business forward.

Why businesses need a GRC solution

- ☑ High demand on resources to track compliance
- ☑ Increase in regulations and changes
- ☑ Internal resources become complacent
- ☑ No integrated GRC approach
- ☑ Poor internal communication
- ☑ Regulations becoming more complex

WHAT YOU
NEED

The keys to compliance and effective risk strategies are knowledge and proactivity. However, it is the application of experience that can transform a competent governance, risk and compliance strategy into a business solution capable of improving operational efficiency, streamlining expenses and optimizing budgets, staff and technology resources.

That's the power of expertise. That is how Supra ITS helps organizations generate significant returns on their investment.

The road to compliance

- ☑ Decrease and manage risk
- ☑ Discover data/information gaps
- ☑ Efficient proof of compliance
- ☑ Ensure year-round compliance
- ☑ Gain '360' industry perspective and insights
- ☑ Greater collaboration
- ☑ Improve IT governance
- ☑ Match regulatory requirements with business goals
- ☑ Minimize liability
- ☑ Reduce cost of compliance
- ☑ Reduce time to compliance

WHAT WE
DO

Working with companies of all sizes, from SMBs to Enterprise and government organizations, Supra ITS provides a complete range of Managed Technology Services.

We build successful pertnerships with our customers by maintaining the highest level of product, technology and regulatory knowledge and expertise in every field. GOVERNANCE, RISK MANAGEMENT & COMPLIANCE

Each year, businesses welcome a host of new regulations (and changes to old ones). These are put in place by the industry bodies and governments responsible for safeguarding the interests and practices of the people and businesses on all sides of the corporate equation.

Supra ITS has the breadth and depth of business experience and technology know-how to relieve companies of that burden. We remove the risk of liability, ensuring that compliance with industry regulations is maintained at all times, and that an organization is operationally effective at all times.

Supra ITS not only delivers peace of mind in a complex world, but hands back those priceless resources–time and money–to its clients.

IN FOCUS

Commonly abbreviated to 'GRC', Governance, Risk Management and Compliance describes the overall strategy and set of procedures put in place by an organization implements in order to avoid legal and regulatory conflict or transgression, operational waste or vulnerability.
